CONSUMABLES AND SUBSTRATES

FIBRE CUTTERS

Fiber cutters

Have you ever wondered whether you can afford a multi-million steel cutting machine? Well now you can own one for less than a million Rand. Considering our fiber cutters can cut all day long with 100% precision, and virtually no finishing work, the benefits are obvious. Slice through sheets of stainless steel, mild steel, aluminium and more. Preserve your Intellectual Property and do it yourself. Fiber cutters are used to cut metal for parts, signage, components and more. We understand that a fiber laser cutter represents a significant investment, and so we offer a full delivery, installation, commissioning and on-site training service.
