

Ideal for personalised signage or banner printing and is easy to operate. The built-in heaters and external fans cure the ink almost instantly. Material that can be printed are wallpaper, canvas, vinyl, PVC vinyl, Contravision, poster paper and more.

Ecosolvent printing does require more heat in order to dry, and this can affect the type of material you can print on. What's more, the ink is not as durable as solvent inks. While it's adequate for outdoor printing work, it's best to only use it for applications which need to last a year or two. Ecosolvent inks have their colours suspended in a mild biodegradable solvent, which means that the ink has virtually no odour as they don't contain as many volatile organic compounds

FEATURES

- Suction table
- Includes drying fans, heaters and take-up system
- Can print on wallpaper, canvas, vinyl, PVC, Contravision, poster paper and more
- Ideal for high speed printing
- Shipped to you as a factory-tested system, and assembled on-site.

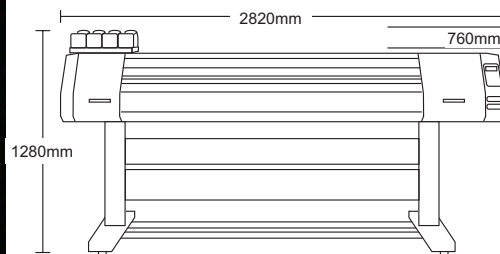

BENEFITS

- Low operating costs
- Easy to clean and maintain
- We hold consumables and spares in stock in Cape Town and Johannesburg

SPECIFICATIONS

Model	: PL-ES-18 SH
Max. Print Width	: 1890 mm
Power Required	: 50/60 Hz 220 V <20A
Print Head	: Xp600 (Dx8)
X/Y/Z-axis motors	: Stepper Motors
RIP Software	: MainTop
Draft Speed	: 30 m ² /h
Standard Speed	: 25 m ² /h
Quality Speed	: 20 m ² /h

Ink Type	: EcoSolvent Ink
Ink colours	: CMYK
Ink Supply System	: Continuous
Ink Consumption	: 15 ml / Square Metre
Interface	: USB
Net Weight	: 165 kg
Dimensions	: 2820 x 1280 mm
OS Required	: Microsoft XP / Win7-10
